

I Am 24 years old and for the past few years I have been dealing with severe tension headaches. I tried just about everything, including massage, muscle relaxers, and up to 4-6 Tylenol a day and the pain would only go away temporarily. My family was pushing me to see a chiropractor, but I was really nervous about my neck being adjusted. I did not want to be in anymore pain than I was already in.

One Monday night I was flipping through the TV channels when I came across Accent on Health's infomercial. I heard Dr. Waldt say that he specialized in reliving tension headaches. I could really tell that he was serious about his work and really wanted to help people.

The next day I called Accent on Health to set up an appointment. That very same day Dr. Waldt had me come in to have a few x-rays taken. After he looked at the results of my x-rays he explained to me why I was getting such bad headaches and assured me that he could help.

That week I had 2 adjustments and was already experiencing a huge difference. I could not believe it; I had little to no more headaches. I was excited and mad at the same time; excited because I was feeling 95% better and mad because I waited so long to see a chiropractor.

I have been getting adjustments for a little over a month now and I am so thrilled to tell everyone that I have no more headaches and not only did the adjustments help with my neck, they have also helped with my allergies. I have had severe allergies since I was a child and have always taken medication. I could never be outside for a long period of time with out having an allergy attack and now thanks to Dr. Waldt I have no symptoms. I would have never guessed that Chiropractic work could help with so many different illnesses. I can not tell enough people how much it truly has changed my life. I am so glad that I decided to visit Dr. Waldt.

Sincerely,
Amy Curley
