

We started coming to see Dr. Walt in March
07. My husband started first and was having a
lot of success with his adjustments. We came
in to see one of his xrays, I asked Dr. Walt
if he treats children. I began to explain to him
how our son Aydin has had many ear infections
and that he has been on anti-biotics for
several months. He told me that he sees children
all the time and has a special adjustment, just
for ear infections. We scheduled a time and my
husband and I came in with our son and had his
adjustment. Dr. Walt told us that his ear might
drain overnight and we might see stuff on
his pillow. The adjustment took only a few
minutes and Dr. Walt was kind and gentle to him.
The next day sure enough the fluid had come
out on his pillow. The ear infection that couldn't
be fixed by medicine, Dr. Walt fixed with his
1st visit. God has truly given him a gift to
help not just adults but children too.

Thank you Dr. Walt for
taking away his pain.
