

My daughter, Jessica, at age 10, started complaining a lot of back pain. She then was found to have a slight curve and we decided to find a chiropractor. Before we even found one she had a sledding accident. We found Accent on Health and Dr Waldt ~~man~~ got us in right away.

Within a month of care Jessica went from 3 or more times a week being in a lot of pain to maybe a couple times a month! Now after almost 9 months of care Jessica's back looks great and feels great! I can't even remember the last time I had to give her pain medicine because of back pain. We thank God and thank Dr Waldt for helping Jessica to get a strong healthy spine.
