November 28, 2007

I first met Dr. Waldt through his info-mmercial on Pottstown Cable TV. I watched Dr. Waldt's program for a long time and thought he seems so caring but I can't believe he could help me. Dr. Waldt's claims seemed too good to be true!

My friend and her family were patients of Dr. Waldt and she had been encouraging me for 3 years to give Dr. Waldt a chance to help me. I was afraid to let Dr. Waldt touch me because I thought the adjustment would hurt (even though I had suffered with horrible neck and back pain for 7 years)! Plus, I had occasional numbness in both hands.

Then about 2 months ago, I was shopping and when I got home I had terrible back and neck pain. I guess I had just had enough, so I picked up the phone and called Dr. Waldt's office. To my surprise, Dr. Waldt answered the phone. I started talking to him and telling him my problems. He saw me the next day, which was a Saturday. How many doctors will see you on a Saturday! He took time with me, talked to me, took x-rays and showed me the problem and said that he would love to try to help me.

I had my first adjustment the next Monday. Dr. Waldt was very gentle with his treatment. I was sore the first few adjustments, but soon enough the adjustments no longer made me sore.

Dr. Waldt is a very caring and kind person. He has been helping me to feel better. I still can't believe I am coming here! The staff are all very nice, too. I feel I belong here. Since Dr. Waldt has helped me, I now find myself encouraging others to see if Dr. Waldt can help them too. Thank you, Dr. Waldt, for caring about me and all your patients.
