I can't explain in words what your care means to me. *There is no other way to describe your treatment but amazing!*

I pinched a nerve in my neck lifting weights. The burning pain shooting down my neck into my right hand was so unbearable that I had to go to the emergency room. The shot of Demoral they gave me at the ER didn't even help! The next day I went to see my M.D. He gave me pain pills and anti-inflammatories. They helped a little. But nothing helped me nearly as much as your adjustments.

Your office has such a great feeling inside. Most medical offices are cold. Yours is filled with warmth and compassion. *When you walk through the door, you just know you're in the right place.*

I try to take every negative experience and find the positive lesson in it. Although we had been friends for years, I never knew exactly what chiropractic was. I now see first hand what you do to help people and how you do it. *If it took hurting myself to learn about chiropractic, it was worth it!*

You're making a difference in the lives of others. Is there a greater calling than that?

I'm grateful for your help, and I'm blessed for having you in my life. Thank you.

--Paul Winterbottom, Personal Fitness Trainer (Pottstown)
